CPSC 233 – Individual Assignment 10

Requirements

Submit the java file named Vowels.java with the static method named numOfVowels such that

- The method takes only a single parameter: a string
- The method returns an int -> the number of vowels in the parameter (ignoring 'y')
- There are no variables defined outside of a method.
- numOfVowels is recursive

Note that the marks are only added if your solution is recursive.
